REASONS FOR ALLOWANCE

1. Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance

Independent claims 1 and 2 recite a coating composition comprising a matrix forming component and particles of a composite metal oxide wherein the composite metal oxide particles are composed of iron oxide and titanium oxide and wherein the weight of the iron oxide to the titanium oxide is in the range of 0.0005 to less than 0.005 and wherein a film formed from the coating liquid exhibits no perceived photochromism or coloration from weathering.

The closest prior art, Kayanoki (US 5,963,373), disclose a coating comprises fine particles of a composite oxide composed of iron oxide, titanium oxide and a silica component. The weight ratio of the iron oxide to the titanium oxide is in the range of 0.005 to 1.0. However, the Applicants have shown that the two ranges (the claimed range and the range of the prior art) have significantly different properties, i.e., the claimed coating liquid exhibits no perceived photochromism or coloration upon weathering when the weight ratio of the Fe_2O_3 to TiO_2 is in the claimed range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
